Custom Spiral Staircase

Treads Can Be Customized To Enhance Your Design

Custom Spiral Stair Attributes

Compass Ironworks provides spiral staircases that rise to the top in quality and beauty across the industry. Our spiral staircases are *luxury designer staircases*, **not** your run of the mill spiral stair kit.

What our clients love about the Compass Spiral Staircase:

- **Customizable:** Elevates your architecture to new heights of elegance with our custom design approach to every stair.
- **Fully Welded Unit:** Unlike staircase kits, our staircases are fully welded systems that provide the highest level of rigidity.
- **Outside Skirt:** This detail elevates a standard spiral staircase to a *Luxury Designer* staircase. It also adds significant rigidity to the overall system.
- **Created with anti-corrosive materials:** Created with architectural grade aluminum to minimize any rust or corrosion overtime.
- **Custom laser-cut treads:** You can have a variety of designs to meet your style that also have a non-impervious surface.
- **Custom formed treads:** We design each tread with front and back plate bends to provide superior strength and minimize “bounce” in every step.
- **Light weight:** Our spiral staircases weigh 1/3 the weight of a standard steel staircases.
- **4-inch diameter, heavy wall, center pole**
- **Spatially Efficient:** Our spiral staircase can provide a way to transition from floor to floor in manner that requires minimal space.
- **Created with anti-corrosive materials:** Created with architectural grade aluminum to minimize any rust or corrosion overtime.
- **Light weight:** Our Helical staircases weigh 1/3 the weight of a standard steel staircases.

“There are spiral staircases...and then there are Compass spiral staircases!”
